CORK PRODUCTS

Cork is a natural material that comes from the bark of the cork oak tree, with unique and incomparable qualities that no ingenious human has yet managed to copy or improve. Its cell structure resembles a honeycomb, enabling it to act as a natural thermal and sound insulator and also providing shock absorbing properties.

These exclusive qualities of cork make it ideal to use in flooring, as it grants an exceptional comfort while also being a renewable and sustainable resource.

Cork is the ultimate amazing step in flooring offering a low thickness floating solution with all the benefits of floors with Corktech. 6mm

The Corktech technology enabled the creation of an innovative core board made of composite cork. It is water resistant and incredibly stable, while maintaining the resilient properties and unmatched comfort brought by cork. Ideal for renovations by using a unique engineered multilayer structure, which combines state of the art technology with the exclusive natural properties of cork, a higher standard in flooring was achieved, providing the perfect match between beauty, comfort and durability.

Cork floors offer a range of very attractive and realistic visuals reproduced through RST optic image technology, which achieves highly impressive natural looks, making it a greener and natural solution when it comes to wood or stone reproductions.

The uniqueness of Cork floors was achieved by integrating a prime quality core layer of cork, which provides superior comfort, noise reduction and warmth. An integrated cork underlay reinforces thermal and Acoustic properties, resulting in a silent environment and important energy cost savings.

- Protective wear layer
- Genuine cork veneer
- Agglomerated cork
Step sound reduction,
warmth & comfort
- High density fiberboard
- Insulating cork underlay
Impact sound reduction,
& thermal reinforcement

MORE THAN JUST A BEAUTIFUL FLOOR

+ SILENCE

Cork's natural properties make it an excellent sound absorber. Cork Products floors reduce noise transmission between and within rooms, creating a quieter and peaceful environment.

+ NATURAL THERMAL INSULATION

The unique thermal insulation features of cork provide an optimal floor temperature all year round, assuring a more warm and comfortable ambiance with energy cost savings

+ WALKING COMFORT

Cork product floors are very comfortable to walk on due to cork's natural and inherent flexibility providing a unique comfort in movement. Even when walking barefoot, a sense of cosiness is felt.

+ BODY WELLNESS

Softer than wood and harder than carpets, the perfect mix to absorb heel strike impacts, relieving leg and back stress, but stable enough to help the foot impulse and decrease the walking fatigue.

+ IMPACT RESISTANCE

Artcomfort floors have the ability to bounce back from hard impacts, which makes them very robust and increases the life span of the flooring.

DEKWALL

Warm & Comfortable

Feel a warm and pleasant touch under your barefoot

Sustainable & Conscious

The true sustainable flooring

Stylish & Cosy

A cosy living with the freshness of a modern décor

The uniqueness of **Dekwall** wall coverings was achieved by integrating two cork layers with different purposes.

The thicker layer is made with agglomerated cork and is used as a backing, providing superior comfort, noise reduction and warmth. The decorative veneer is a thin sheet of cork, created by combining various shapes of natural cork, achieving genuine and authentic visuals full of personality. For increased protection, the visual is coated with a waxed or varnished finishing.

In modern interior design, the creation of spaces with style and personality starts with beautiful and expressive walls. Using and combining different shapes of natural Cork, our team of experts and trendsetters created a unique collection that opens a new approach in decoration, in harmony with nature and human emotions.
